 Lahore

I am a Full Stack Node.js and Golang Developer specializing in backend development with experience in RESTful APIs, optimizing databases, and integrating third-party services for seamless front-end to back-end communication. I am skilled in security implementation, troubleshooting, and resolving technical issues promptly to ensure uninterrupted application performance. I am proficient in Golang and Node.js frameworks, databases, and DevOps practices.

PROFESSIONAL EXPERIENCE

Sep 2021 – present
Lahore, Pakistan

Devex IT, Full Stack Developer

- RESTful APIs and third-party services integration to enable seamless communication between front-end and back-end systems
- Designing and optimizing databases to ensure efficient data storage and retrieval including caching mechanisms to improve application performance and reduce database load
- Collaborating with cross-functional teams, including front-end developers and UI/UX designers, to deliver high-quality software solutions
- Ensuring the security of web applications by implementing proper authentication and authorization mechanisms
- Optimizing application performance by identifying and resolving bottlenecks in code, database queries, and server configurations
- Troubleshooting and resolving technical issues in a timely manner to minimize downtime and maintain a smooth user experience
- Integrating payment gateways and implementing secure payment processing functionality within web applications
- Troubleshooting and debugging issues reported by users or discovered through monitoring tools, providing timely resolutions
- Prompt Engineering & Generative Artificial Intelligence integration on the back-end via OpenAI, including structured responses via Zod
